Regionalisation, Growth, and Economic Integration (Contributions to Economics)

Regionalisation, Growth, and Economic Integration (Contributions to Economics)

This book analyses the process of regionalisation and plots its future development. Regionalisation is a common feature of the changing territorial organisation of European states today. Regionalisation alone, however, cannot produce any of the benefits attributed to it without looking into the conditions in which it occurs. Bringing together theory and empirical applications, coverage examines a host of these conditions.
