"The United States in the year 1993 ? suffering from over population and the wanton neglect of treating sludge beds of chemical and raw sewage along the Pacific and Atlantic Seaboards has served to promote the direst ecological disaster the U.S. has ever known.

The sludge, in its monstrous growth has become one large mass extending from Vancouver to Mexico and from Nova Scotia to the Florida Keys, infecting the Gulf States and the St. Lawrence Seaway as well, that serves to create a colossal migration of tens of millions of human souls away from all the coastlines.

Unknowingly, two families are on a collision course, each hurdling toward one another by horrific means that includes devastating losses."
