Trauma-Informed Treatment and Prevention of Intimate Partner Violence Casey T. Taft, Christopher M. Murphy, Suzannah K. Creech

Most models of Intimate Partner Violence (IPV) and training programs for practitioners who work with individuals who engage in IPV fail to take into consideration the impact of trauma on relationship functioning. This book gives mental health professionals the knowledge and skills they need to provide effective treatment to these individuals, the majority of whom have a history of exposure to trauma. The authors draw on their extensive clinical experience as well as extensive research to help clinicians assess and intervene both with military personnel and civilians who belong to this "hard to treat" population. Their positive approach to treatment addresses trauma-related issues in those who experience IPV as well as those who engage in it. Clearly written and approachable, the book provides guidelines for intervention with groups, couples, and individuals, providing much-needed answers to both common and unexpected clinical challenges.
