**Experimental Design and Analysis (Quantitative Applications in the Social Sciences)** Steven R. Brown, Lawrence E. Melamed

This volume introduces the reader to one of the most fundamental topics in social science statistics: experimental design. The authors clearly show how to select an experimental design based on the number of independent variables and the number of subjects. Other topics addressed include variability, hypothesis testing, how A.N.O.V.A. can be extended to the multi-group situation, the logic of the t test and completely randomized designs.
