Function and Biosynthesis of Lipids (Advances in Experimental Medicine and Biology)

This volume contains the proceedings of the International Symposium on Function and Biosynthesis of Lipids held November 1976 at Sierra de la Ventana, Argentina. The conference was organized by the Argentine Biochemical Society and co-sponsored by the International Union of Biochemistry and the Pan American Association of Biochemical Societies. The Symposium's great success is owed to all the participants, most of whom were actively involved in the interesting and stimulating discussions that followed every single lecture and communication delivered. Many thanks also to Drs. R. Anderson, S. Bonting, K. K. Carroll, B. Cecarelli, M. A. Crawford, R. T. Holman, J. Mead, R. H. Michell, G. Porcellati, W. Stoffel, W. Thompson, and H. Wiegandt for chairing Symposium sessions. The contributions are organized in four sections, preceded by the opening lecture on the role of dolichol phosphate in glyco protein biosynthesis delivered by Dr. Luis F. Leloir. The first section, on aspects of lipid involvement in the biogenesis of membranes, covers the biosynthesis of saturated and unsaturated fatty acids, including enzymology, biosynthetic pathways, and regulation and modifications during development, in the fetus and in tumor cells. Papers on the composition and assembly of membrane components, lipid interactions with proteins and enzymes, developmental changes of lipids, and newer approaches to survey the organization and biogenesis of cellular membranes complete this section. New information as well as reviews of current concepts about structural specificity, biosynthesis, and function of glycosphingo lipids are included in the second section.

From reader reviews:

Alta Valentin:

Nowadays reading books be than want or need but also turn into a life style. This reading practice give you lot of advantages. Advantages you got of course the knowledge the actual information inside the book this improve your knowledge and information. The details you get based on what kind of guide you read, if you want get more knowledge just go with education and learning books but if you want really feel happy read one having theme for entertaining including comic or novel. The particular Function and Biosynthesis of Lipids (Advances in Experimental Medicine and Biology) is kind of guide which is giving the reader erratic experience.

Marcos Gorman:

This book untitled Function and Biosynthesis of Lipids (Advances in Experimental Medicine and Biology) to be one of several books this best seller in this year, here is because when you read this book you can get a lot of benefit on it. You will easily to buy this kind of book in the book shop or you can order it via online. The publisher of the book sells the e-book too. It makes you easier to read this book, since you can read this book in your Touch screen phone. So there is no reason to your account to past this book from your list.

Thomas Hodge:

The reserve with title Function and Biosynthesis of Lipids (Advances in Experimental Medicine and Biology) includes a lot of information that you can understand it. You can get a lot of help after read this book. This book exist new knowledge the information that exist in this publication represented the condition of the world right now. That is important to yo7u to learn how the improvement of the world. This particular book will bring you in new era of the syndication.
