The New Landscape of Mobile Learning: Redesigning Education in an App-Based World

The New Landscape of Mobile Learning: Redesigning Education in an App-Based World

The New Landscape of Mobile Learning is the first book to provide a research based overview of the largely untapped array of potential tools that m-Learning offers educators and students in face-to-face, hybrid, and distance education. This cutting edge guide provides:

- An essential explanation of the emergence and role of Apps in education
- Design guidelines for educational Apps
- Case studies and student narratives from across the US describing successful App integration into both K-12 and Higher Education
- Robust, research-based evaluation criteria for educational Apps

Although many believe that Apps have the potential to create opportunities for transformative mobile education, a disparity currently exists between the individuals responsible for creating Apps (i.e. developers who often have little to no instructional experience) and the ultimate consumers in the classroom (i.e. K-20 educators and students). *The New Landscape of Mobile Learning* bridges this gap by illuminating critical design, integration, and evaluation narratives from leaders in the instructional design, distance education, and mobile learning fields.
