Chemical Sensors and Biosensors (Iste)

Chemical Sensors and Biosensors (Iste)

Technological needs for chemical, ionic and biological species detection are giving rise to continuous research and development in physico-chemistry and biology. The constant progress being made in the theoretical and technological aspects concerning studies and developments of chemical sensors, biosensors and biochips is presented in this book by different scientists and professors from different universities and constitutes an updating of the state of the art for chemical sensors, biosensors and biochips.

This book places a large emphasis on interaction between chemical and biological species, in a gaseous or liquid state, and details mineral and biological materials acting as sensitive elements. The role of electrical, electrochemical, piezoelectric and optical transducers in detection mechanisms are presented through their developments and from a performance point-of-view. Micro-reactors, nanotechnologies and flexible substrates, are considered in relation to their role in neural networks.

Contents

1. Chemical and Biological Recognition, Nicole Jaffrezic-Renault.
2. Adsorption Phenomena, René Lalauze.
3. Microcantilever Transduction, Isabelle Dufour.
4. Piezoelectric Transduction (QCM), Hubert Perrot.
5. Metal Oxide Gas Sensors, Christophe Pijolat.
6. Molecular Material-based Conductimetric Gas Sensors, Marcel Bouvet.
7. Responses and Electrical Properties of Gas Microsensors, Khalifa Aguir.
8. Gas Microsensor Technology, Philippe Menini.
9. Multisensors: Measurements and Behavior Models, Philippe Breuil.
10. Development of Microtechnologies for the Realization of Chemical, Biochemical and/or Biological Microsensors, Pierre Temple-Boyer.
11. Development of Micro-preconcentrators for the Detection of Gaseous Species at Trace Level, Jean-Paul Viricelle.
12. Microfluidics: Manipulation of Nanovolume Samples, Louis Renaud.
13. Electrochemical Biosensors, Chantal Gondran.
14. Fiber-optic Biosensors, Neso Sojic.
15. In Vivo Analyses with Electrochemical Microsensors, Stéphane Arbault.
16. Microbial Biosensors for Environmental Applications, Gérald Thouand and Marie José Durand.
17. Biofuel Cells, Serge Cosnier.

From reader reviews:

Susan Gagnon:

Nowadays reading books be a little more than want or need but also work as a life style. This reading addiction give you lot of advantages. The huge benefits you got of course the knowledge the particular information inside the book that will improve your knowledge and information. The details you get based on what kind of reserve you read, if you want drive more knowledge just go with knowledge books but if you want feel happy read one having theme for entertaining including comic or novel. Typically the Chemical Sensors and Biosensors (Iste) is kind of e-book which is giving the reader unforeseen experience.

Dan Fry:

Are you kind of stressful person, only have 10 or perhaps 15 minute in your day time to upgrading your mind talent or thinking skill even analytical thinking? Then you are having problem with the book when compared with can satisfy your limited time to read it because this all time you only find e-book that need more time to be read. Chemical Sensors and Biosensors (Iste) can be your answer because it can be read by anyone who have those short extra time problems.

Rose Ibarra:

What is your hobby? Have you heard which question when you got students? We believe that that problem was given by teacher to their students. Many kinds of hobby, Every individual has different hobby. Therefore you know that little person similar to reading or as reading through become their hobby. You need to know that reading is very important and book as to be the matter. Book is important thing to provide you knowledge, except your current teacher or lecturer. You will find good news or update in relation to something by book. A substantial number of sorts of books that can you go onto be your object. One of them is Chemical Sensors and Biosensors (Iste).

Michael Sheridan:

Reading a guide make you to get more knowledge from it. You can take knowledge and information from a book. Book is published or printed or created from each source this filled update of news. With this modern era like at this point, many ways to get information are available for you. From media social like newspaper, magazines, science book, encyclopedia, reference book, novel and comic. You can add your understanding by that book. Are you hip to spend your spare time to open your book? Or just trying to find the Chemical Sensors and Biosensors (Iste) when you necessary it?
