Deborah Lynch

"Doing Ethical Research with Children is an invaluable resource for all student and practitioner-researchers who wish to honour children as active agents and significant voices in research. The book guides the reader through the processes of ethical research with (not on!) children, positioning the child as competent and capable. It includes practical guidance and examples of research so that issues that may emerge during a research project can be anticipated. My advice is - do not embark on an Early Years research project before reading it!" Lyn Trodd, Chair of the National Sector-Endorsed Foundation Degree in Early Years Network (SEFDEY), University of Hertfordshire, UK "Doing Ethical Research with Children provides an invaluable guide to understanding and managing the ethical implications of research projects with children. The highly accessible format includes useful case-study examples, questions and checklists and the four-phased approach supports the reader to reflect on ethical considerations at every stage of the research process. This book is a welcome and essential resource that positions ethical perspectives at the heart of research activity with children." Shirley Allen, Senior Lecturer Early Childhood Studies, Middlesex University, UK "This is an admirably clear and well-structured book that will be invaluable for anyone serious about research with children. The authors write from long experience, and provide a very helpful 'step by step' guide that is always underpinned by deeply principled, insightful considerations that exemplify good practice and respect for children. The use of real examples along with the authors' questions, invite the reader to reflect on their own thinking and actions, and the extensive checklists and sample documentation provide clear guidance that will be a valuable support for students and their supervisors, researchers, and practitioners alike. I look forward to making good use of this book in my own work and in my work with
