About The Book Ralph Waldo Emerson, the American writer and moralist, was born at Boston on May 25, 1803, of English stock and a family of preachers. He was educated at Harvard for the Unitarian ministry, and became a settled pastor in Boston before he was twenty-six. Three years later he resigned his charge owing to theological disagreements. In 1833 he visited Europe and England as a hero worshipper, his desire being to meet Landor, Coleridge, Wordsworth, and Carlyle. He saw them all, and formed a lifelong friendship with Carlyle. Returning to America, he settled at Concord, where he lived till his death, on April. 27, 1882. His public work took the form of lectures, of which his books are reproductions. In 1836 he published his first book, "Nature," anonymously. "Nature" was the germ essay from which all Emerson's later work sprang, a first expression of thoughts that were expanded and developed later. It was published in 1836, when its writer was thirty-three years of age, and known only as a preacher who had become a lecturer. Already Emerson had adopted the methods of a seer rather than those of the consecutive thinker. "Nature" was one of the first-written books of great writers that made a deep impression on the understanding few, but had only a few readers. It presaged the greatness to be; and indeed its poetical quality carries a charm, which Emerson sometimes failed to reproduce and never afterwards surpassed.
