## Open MIND: Philosophy and the Mind Sciences in the 21st Century (MIT Press)

This collection offers the most comprehensive collection on consciousness, brain, and mind available. It gathers 39 original papers by leaders in the field followed by commentaries written by emerging scholars and replies by the original paper's authors. Taken together, the papers, commentaries, and replies provide a cross-section of cutting-edge research in philosophy and cognitive science. Open MIND is an experiment in both interdisciplinary and intergenerational scholarship.

Open MIND grows out of the MIND Group, an independent, international body of young philosophers and scientists with a strong interest in the mind, consciousness, and cognition. The original and supporting materials are available online at [open-mind.net](http://open-mind.net).
