Geotechnical Engineering for Disaster Mitigation And Rehabilitation: Proceedings of the International Conference Singapore, 12-13 December 2005

Geotechnical Engineering for Disaster Mitigation And Rehabilitation: Proceedings of the International Conference Singapore, 12-13 December 2005

After the devastating disaster caused by the tsunami on 26 December 2004, disaster mitigation and rehabilitation have become some of the most pressing topics for discussion in geotechnical engineering and related professions. Some of the most important contributions to this discussion were made during the International Conference on Geotechnical Engineering for Disaster Mitigation and Rehabilitation, the first of its kind held in the Asia-Pacific region. It was organized by the Joint Working Group on Geotechnical Engineering for Disaster Mitigation and Rehabilitation (JWG-DMR), which is supported by national geotechnical societies from Australia, China, India, Indonesia, Japan, South Korea, Southeast Asia (comprising Malaysia, Singapore, Taiwan and Thailand) and Sri Lanka. Disaster management encompasses diverse topics such as natural disasters (tsunamis, earthquakes, landslides, etc.), mitigation (early warning and prediction systems, hazard mapping, risk analysis, coastal protection works, etc.), rehabilitation and reconstruction (difficult soils and ground treatment, design against earthquakes and other natural disasters, etc.), and many others, including soil dynamics, liquefaction, stability, and environmental protection. This volume contains over 100 high quality papers contributed by authors from participating countries, including keynote and invited lectures delivered by eminent researchers and practitioners. The proceedings will benefit the geotechnical profession as a whole, in particular those who are involved in disaster prevention, mitigation, rehabilitation and reconstruction works. In addition, the contributions will add impetus to research and development in this important domain: the long-term goal is to mitigate the unacceptable magnitude of destruction and the number of human lives lost such as in the recent 2004 tsunami tragedy.

From reader reviews:

Tom Copper:

Why don't make it to be your habit? Right now, try to ready your time to do the important behave, like looking for your favorite book and reading a reserve. Beside you can solve your problem; you can add your knowledge by the publication entitled Geotechnical Engineering for Disaster Mitigation And Rehabilitation: Proceedings of the International Conference Singapore, 12-13 December 2005. Try to face the book Geotechnical Engineering for Disaster Mitigation And Rehabilitation: Proceedings of the International Conference Singapore, 12-13 December 2005 as your pal. It means that it can to get your friend when you really feel alone and beside regarding course make you smarter than in the past. Yeah, it is very fortunated for you. The book makes you much more confidence because you can know anything by the book. So , we should make new experience in addition to knowledge with this book.

Tyrone Hogans:

The book Geotechnical Engineering for Disaster Mitigation And Rehabilitation: Proceedings of the International Conference Singapore, 12-13 December 2005 make you feel enjoy for your spare time. You may use to make your capable a lot more increase. Book can to be your best friend when you getting tension or having big problem with the subject. If you can make reading through a book Geotechnical Engineering for Disaster Mitigation And Rehabilitation: Proceedings of the International Conference Singapore, 12-13 December 2005 to become your habit, you can get much more advantages, like add your personal capable, increase your knowledge about many or all subjects. You can know everything if you like open up and read a book Geotechnical Engineering for Disaster Mitigation And Rehabilitation: Proceedings of the International Conference Singapore, 12-13 December 2005. Kinds of book are a lot of. It means that, science publication or encyclopedia or others. So , how do you think about this guide?

David McCabe:

This Geotechnical Engineering for Disaster Mitigation And Rehabilitation: Proceedings of the International Conference Singapore, 12-13 December 2005 usually are reliable for you who want to become a successful person, why. The main reason of this Geotechnical Engineering for Disaster Mitigation And Rehabilitation: Proceedings of the International Conference Singapore, 12-13 December 2005 can be on the list of great books you must have is definitely giving you more than just simple studying food but feed you actually with information that might be will shock your previous knowledge. This book is definitely handy, you can bring it just about everywhere and whenever your conditions both in e-book and printed versions. Beside that this Geotechnical Engineering for Disaster Mitigation And Rehabilitation: Proceedings of the International Conference Singapore, 12-13 December 2005 giving you an enormous of experience for example rich vocabulary, giving you test of critical thinking that we understand it useful in your day activity. So , let's have it and revel in reading.

Ronald Tanaka:

Does one of the book lovers? If so, do you ever feeling doubt when you are in the book store? Aim to pick one book that you never know the inside because don't evaluate book by its protect may doesn't work here is difficult job because you are frightened that the inside maybe not seeing that fantastic as in the outside seem likes. Maybe you answer is usually Geotechnical Engineering for Disaster Mitigation And Rehabilitation: Proceedings of the International Conference Singapore, 12-13 December 2005 why because the great cover that make you consider concerning the content will not disappoint anyone. The inside or content is definitely fantastic as the outside or cover. Your reading 6th sense will directly guide you to pick up this book.
